Microsoft 365

Compliance in Azure and Microsoft 365

Data is our new currency

Organizations face more
and more compliance and
regulatory requirements

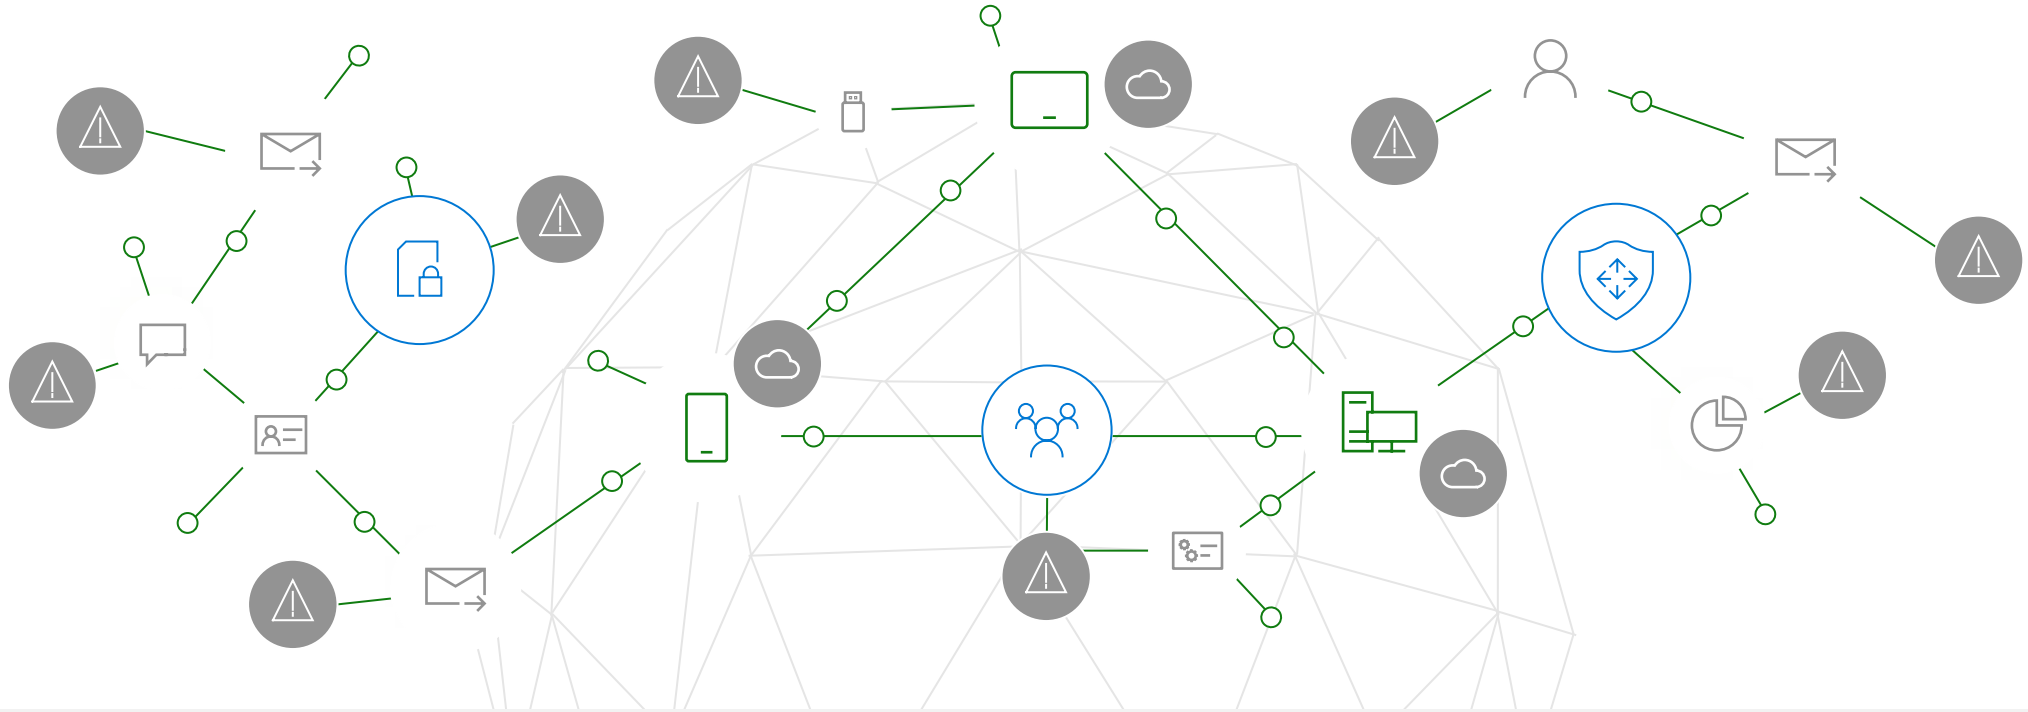

Data growth is enormous

Security and control
needs automation and
standardization

Data protection concerns of organizations

We need to handle sensitive or highly confidential data.

We face regulations and organizational needs.

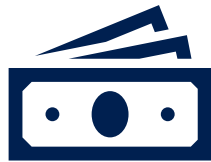

We need to identify and reply fast to security and compliance incidents

Advanced Data Residency in Microsoft 365

Advanced Data Residency ensures that data is stored in compliance with data protection regulations in the desired location.

This helps organizations avoid regulatory fines and legal liabilities.

Enhanced data control: Advanced Data Residency provides organizations with greater control over their data, including where it is stored.

Increased data privacy: Data residency ensures that sensitive data is stored in the desired location.

Geographies & availability / Microsoft 365 (EMEA)
